

Provider Talking Points: Fundamental Model

Here are some talking points you can use to share why you enrolled in Quality Start LA, and how this program directly supports children and families.

Quality early learning is invaluable.

- A child's brain grows faster during their first five years of life than any other time in their development.
- Studies show that children who receive high-quality early learning experiences from birth to age five often have higher reading, math, and critical thinking skills.

Quality Start LA is part of a national movement to improve early learning programs.

- We are proud to participate in Quality Start LA, which is part of a national quality improvement serving over 900 providers in LA County!
- Quality Start LA's participating programs, such as ours, are licensed and go above and beyond industry standards to provide high-impact, high-quality child care. These programs include state-funded preschools, Head Start, private centers and family child care homes in our community.

Quality Start LA supports my professional development.

- As a Quality Start LA participant, I have access to a variety of professional development opportunities and resources to be a more effective early learning teacher/director/site supervisor/owner.
- By participating in Quality Start LA, our program receives additional funds to purchase educational supplies, books, and other resources to best meet the needs of the children and families we serve.

Families are partners in providing high-quality care and education.

- You are your child's first teacher and best advocate. I look forward to working with you to support your child's healthy growth and development.
- Family members, like you, are valuable to our program. I hope you will come visit the classroom, participate in our activities, or share your skills with our program. Your child will cherish the memories and it will support your child's learning and healthy development.
