DLL Module 10: Engaging DLLs in Project Based Learning

Session will be held on:

June 11, 2022

9:00 am – 11:30 am

Zoom Session

This module will review the importance of an integrated approach to learning and how teachers can utilize a project-based approach to draw on children's strengths, interests, and background as they create engaging opportunities for learning. Project Based Learning incorporates multiple means of engagement, multiple means of representation, and multiple means of action and expression. Participants will explore how to utilize a project based approach to develop culturally relevant learning opportunities, using themes or topics as focal points.

Key Concepts:

- Overview of project-based learning
- Integrated nature of learning
- Powerful role of play
