

At Home Early Learning

BRAIN BUILDING ACTIVITIES

Infant & Toddler

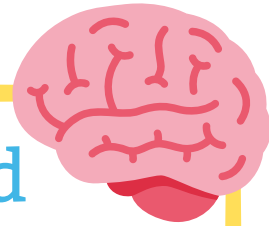

If your child is starting to throw and drop things, turn it into a game!

All Fall Down

How to play:

1. When your child throws something, shout, "All fall down!"
2. As you pick the object up, tell him/her what it is.
3. Hand it back to your child.
4. Repeat!

Brainy Background

When you play this game, these parts of your child's brain light up at the same time:

- The area that plans how your child is going to move physically
- The area that analyzes sounds

They're learning both self-control and language!
