

At Home Early Learning

BRAIN BUILDING ACTIVITIES Preschooler/Kindergarten

Turn routine activities like bathing and washing dishes into a game!

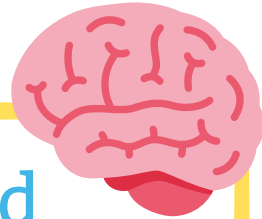

Water Everywhere

How to play:

1. See how many containers you and your child can name that hold water.
2. Take turns calling one out, starting with things like a cup, toilet, or pool.

Brainy Background

When something like water is related to its container, your child is learning to make connections.

The more connections your child makes, the better they will become at thinking in flexible and different ways—all important to creativity and learning!
